

TOM SCOTT

WEB DEVELOPER

I am an experienced Full Stack Developer with a robust background in web development, specializing in automation and process improvement. After a career break of almost three years, I have returned with renewed enthusiasm to continue my career as a web developer. My expertise lies in seamlessly bridging the gap between technical solutions and user needs, continually driving efficiency and innovation in web development projects. I am adept at quickly picking up new technologies and integrating into existing projects, consistently delivering high-quality results.

SKILLS

Frontend

- HTML
- CSS/SCSS
- JavaScript Frameworks: React, Vue, Angular

Backend

- Languages: Node, Python
- Frameworks: Flask

Communication

- API Design: GraphQL, REST

Databases

- PostgreSQL
- MongoDB
- SQL Server
- MySQL

CI/CD

- Cloud Platforms: AWS, Azure
- Tools: Atlassian Suite

DevOps and System

Administration

- Containerisation and orchestration: Docker, Kubernetes
- Linux: Command-line operations and scripting

EXPERIENCE

FULL STACK WEB DEVELOPER

PwC - Enterprise Digital

Nov 2016 - Aug 2021

As a Full Stack Developer, I played a key role in designing and implementing web solutions focused on automation, process improvement, and analytics. I collaborated closely with Business Analysts and stakeholders to ensure our solutions met business needs and complied with relevant legislation. My primary responsibilities spanned the entire development cycle: creating dynamic user interfaces using React, developing robust backends with Node.js, and implementing microservices with Python. I also managed CI/CD pipelines using AWS and Docker to enhance deployment efficiency. While my main stack included React, Node.js, and Python, I successfully adapted to various other technology stacks across different projects, showcasing my versatility and ability to meet diverse project requirements.

DATA ANALYST

PwC - Transaction Services

Sep 2015 - Nov 2016

As a Data Analyst in the Transaction Services team, I managed, cleaned, and processed extensive financial and production datasets, transforming data from summarised to transactional levels. I utilized Python, particularly the pandas library, to streamline data transformation and analysis. Additionally, I integrated and optimized various SQL databases, enhancing data retrieval and reporting accuracy. My proficiency in Alteryx, Tableau, Excel, and Python significantly improved data handling efficiencies and supported informed decision-making.
